Chaotic Innocence

Curated by Luciana Sario

exhibition
info •

Chaotic Innocence encompasses a set of works by Latin American artists that have a special aura where chaotic and innocent features are fused to take us to places filled with magic, suspense, tenderness, hybridism, irony and humor.

Renowned artists such as Ernesto Pujol and young artists such as Carlos Huffmann, Brigida Baltar, Mondongo and Nicolás Trombetta, among others participate in this exhibition. The works that have been included have been done in an array of disciplines including painting, photography, sculptures, digital techniques, collage and performances.

All the works in this exhibition have been selected from the last edition of arteBA, held in June in Buenos Aires, Argentina. In this edition, the fair decided to privilege contemporary art under the theme "artists anticipate the future".
